

# Save upfront on therapy with Thrizer!

Let's run through an example using a therapist's session fee of \$200 and estimated reimbursement of \$150!

## Typical Process

---

You pay your therapist \$200 after the session, request a superbill, submit it to insurance, and receive a \$150 reimbursement check in the mail 4-6 weeks later

## With thrizer

---

You just pay \$60 for the session! You pay \$50, which is the difference between your therapist's \$200 rate and \$150 reimbursement, plus a 5% fee of your therapist's \$200 rate which is \$10. You don't need to submit superbills or wait for reimbursement!
